### Regulations & funds

Governments issue regulations related to environmental practices, employee practices, advertising practices, and much more. Furthermore, government regulations affect how companies structure their businesses, where companies decide to locate, how they classify their employees, and thousands of other things.

### Depth of protection

Defense-in-depth is an information assurance strategy that provides multiple, redundant defensive measures in case a security control fails or a vulnerability is exploited. It originates from a military strategy by the same name, which seeks to delay the advance of an attack, rather than defeating it with one strong line of defense.
